MERYL SKINLIFE

Maintains the Natural
Balance of the Skin

Meryl[®]
skinlife

Natural freshness. Meryl® Skinlife regulates the level of bacteria on our skin.

Odor Control

It is natural to have bacteria on our skin. When exercising, healthy skin microbes are transferred to the textile. With normal nylon fibers, these bacteria can proliferate and grow very quickly, leading to bad smelling garments. Meryl Skinlife, with inherent silver microparticles, ensures that no bacteria can grow in the textile, maintaining the natural balance of the skin and reducing unpleasant odors.

Permanent Effect

Due to the antimicrobial agent in the polymeric matrix, Meryl Skinlife has a permanent effect in the garment (effective after more than 100 washes).

Maximum Comfort

Meryl Skinlife properties allow you to exercise as much as you like and still remain fresh. This makes Meryl Skinlife ideal for any type of clothing that comes into direct contact with the skin.

Discover the range of Meryl Fresh yarns

The latest performance innovations brought to you by Meryl: Meryl Nateo Fresh, that offers an antimicrobial effect with a natural cotton touch and Meryl Nexten Fresh, the outdoor performance favorite, which is a premium hollow fiber with odor control regulation.

Markets & Applications

Whether it is for bodywear or sport fabrics, Meryl Skinlife provides unique value.

Yarn Counts Available

COMPRESSION

Suitable for socks

DTY 78f68x2 FD/SD RD AMB

SOFT

Suitable for seamless

DTY 33f34x1 SD RD AMB

DTY 60f60x1 SD RD AMB

DTY 60f60x2 SD RD AMB

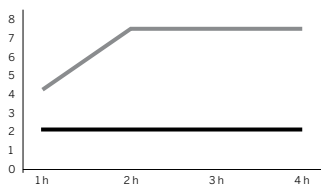

These yarns are available in Cops, Tubes and Beams.

Meryl Skinlife main Properties

Maintains the natural balance of the skin

● No Treatment ● Meryl Skinlife

LOG cfu (Colony-forming unit)

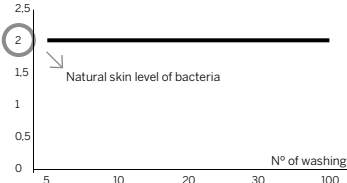

Human skin normally has bacteria presence. A high level of bacteria, as well as a complete absence, creates various problems (allergy, odor, illness, etc.). Meryl Skinlife is not a bactericide: It does not decrease the bacteria level lower than what is normally present on the skin.

Meryl Skinlife is permanent

● Meryl Skinlife

Level of bacteria

Thanks to its inherent silver microparticles, Meryl Skinlife is present in the garment after more than 100 washes.

* ISO 20743 [Note: equivalent to JIS L 1902:2008].

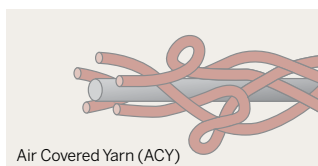

Meryl Skinlife Stretch, premium antimicrobial covered yarns

Discover the last generation of covered yarns proposed by Meryl Skinlife Stretch. Suitable for seamless, thanks to its antimicrobial effect it will maintain the natural balance of the skin.

Seamless

Gauge: 28

Weight: 65 gr/piece

Composition: 95% Meryl Skinlife, 5% EA

Technical Details

Meryl Skinlife does not contain any nanomaterials as defined by the European recommendations 2011/696/EU.

Meryl Skinlife is active against the main bacteria's groups Gram+ (S. Aureus) and Gram- (K. Pneumonia).

Thanks to the presence of the exclusive antimicrobial agents in the polymeric matrix there is no migration from the fabric to skin, avoiding induction of allergy.

Expect the same behavior as any Meryl yarn throughout the stages of industrial processing (dyeability, running, etc.).

Meryl Skinlife fibers are considered biologically safe based on a risk assessment test which guarantees its use for surface medical devices (ISO 10993).

A natural balance on your skin

Meryl Skinlife belongs to the most advanced mix of intelligent polyamide yarns. Its composition offers a permanent antimicrobial effect able to reduce unpleasant odors in your garments. Exercise hard and stay fresh; feel the difference.
